Herbicides

7 PRODUCTS

Weed control from land preparation and burn-down to after emergence.

Touchdown 360 **3–4 L/ha**

LAND PREPARATION

Non-selective herbicide for broad-spectrum control.

Touchdown Hi-Tech 500 SE **2–3 L/ha**

LAND PREPARATION

Non-selective herbicide for broad-spectrum control.

Glyphosate 41 SL **3–4 L/ha**

LAND PREPARATION

Non-selective herbicide for broad-spectrum control.

Vico Plus **1.15 L/ha**

LAND PREPARATION AND BURN-DOWN

Contact non-selective herbicide for broad-spectrum control or burn-down.

Dual Magnum 960 EC **0.9–1.2 per ha**

LAND PREPARATION AND PLANTING

Broad-spectrum weed suppressant. The rate depends on soil type.

Astrovar 500 **2–3 L/ha**

PRE- OR POST-EMERGENCE

Intaba's atrazine, targeting grasses and broadleaf weeds.

Servian **50 g/ha**

POST-EMERGENCE

Selective herbicide to tackle nutsedge.

Insecticides

7 PRODUCTS

Cutworms, Lepidoptera such as fall armyworm and bollworms, aphids and red spider mite.

Karate 5 EC **250–300 mL/ha**

CUTWORMS

Synthetic pyrethroid to kill cutworms and other Lepidoptera.

Karate Zeon **200 mL/ha**

CUTWORMS

Capsule suspension synthetic pyrethroid, with a longer-lasting effect.

Ampligo 150 ZC **120 mL/ha**

LEPIDOPTERA, BOLLWORMS

Insecticide for the control of Lepidoptera, encapsulated for longer protection and efficacy.

Eminent Super **100 g**

LEPIDOPTERA, BOLLWORMS

Broad-spectrum insecticide for the control of Lepidoptera pests (fall armyworm, bollworms).

Aphox **300–500 mL/ha**

APHIDS

Contact action against yellow aphids in sugar cane.

Actara 25 WG **400 g/ha**

APHIDS

Systemic insecticide for the control of aphids. It can be applied as a drench into the cane early in its life.

Amitraz **300 mL/ha**

RED SPIDER MITE

Acaricide for the control of spider mites.

Fungicides

3 PRODUCTS

Wilt, smut and rust, and protection after hail or other leaf damage.

Propiconazole **500 mL/ha**

WILT, SMUT AND RUST

Systemic triazole (DMI) fungicide that works by enzyme inhibition.

Amistar Top 325 SC **500 mL/ha**

WILT, SMUT AND RUST

Combines preventive, systemic, translaminar (it moves across the leaf tissue) and curative properties.

Copper Oxychloride 85 WP **500 g/ha**

LEAF DAMAGE

Contact fungicide to apply when the cane has suffered severe damage, such as hail.

Growth regulator

1 PRODUCT

Shorter internodes before harvest.

Moddus **1 L/ha**

WITHIN 70 DAYS OF HARVEST

Plant growth regulator (PGR) that inhibits the production of gibberellic acid. Used correctly, it shortens the internodes of sugar cane.

Read the label.

Always read and follow the product label. The label is the legal instruction for use.
